

Havoc-OS

Havoc-OS is an after-market firmware based on Android Open Source Project, inspired by Google Pixel with a refined Material Design UI. We offer a smooth and stable experience for your device with a selected set of amazing features that provide an exceptional user experience.

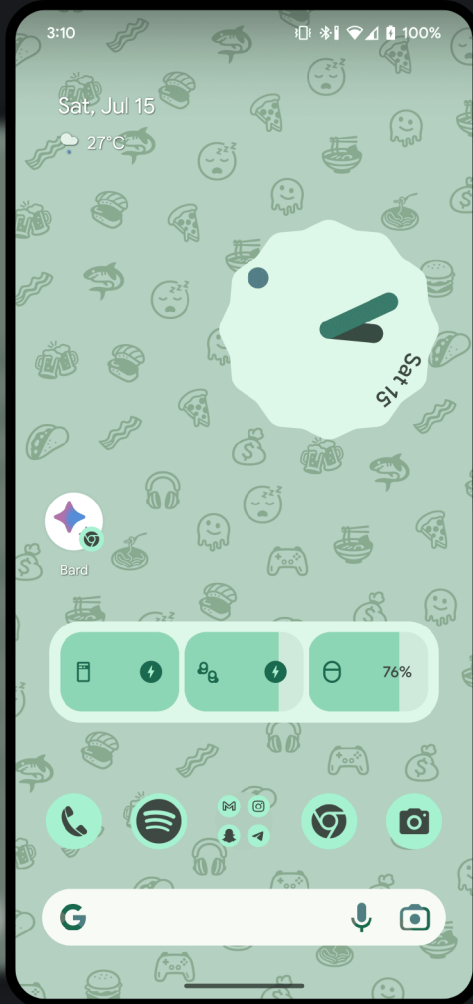

Our ROM is available for over 150+ Devices across 20+ OEMs.

Generic System Images (GSI) are available, so you can try out our ROM even if your device isn't currently supported. Our device roster keeps growing with support for more devices added every month.
