there's no blankflash for android 11 can someone please help?

@Jairsantana take a look at this site:

lolinet mirrors - firmware, software, iso etc.

lolinet mirrors - powered by h5ai

mirrors.lolinet.com

May 31, 2022

For me, blankflash\_racer\_retail\_rebuild\_RPDS31.Q4U-39-26-14-10 fixed it.

On one of the other blankflash versions I was getting this error:

```
Code:
[ 3.403] Flashing partition with gpt.bin
[ 3.404] ERROR: do_package()->do_recipe()->do_flash()->flash_simg()->find_first_packa
```

Make sure you use Copy A/B script again before flashing a new from after restoring from LMSA

ш

None of the blankflash worked for me. I'm getting ERROR: sahara\_greet\_device()->change\_mode()->do\_hello()->IO error

Can anybody help? I'm hard bricked.
